Exhaust Collector Ring

Exhaust Collector Ring, Enhanced Signet Part Number 53-0100

Alternative to Aixtron Part Number 40070130

The Signet 2600G3 exhaust collector ring has been engineered to provide maximum operational lifetime. The ring is assembled using a "double weld" technique and we have moved the tabbed slots to locations where they are less likely to contribute to an early mechanical failure.

All Signet Products are delivered clean and ready for use.

Ref. = Design Alteration of OEM Part
