Signet Kit 9500

Assembled Kit components

Signet 9500 Kit components: Teflon Cover, Clamp Bolt Retainer and KEL-F Screw

Signet now offers this convenient TCP Ceramic Window kit for LAM 9600 TCP.

Our Maintenance Kits are a win-win for our customers. All the parts that should be replaced during each maintenance will be replaced as they are all right there in the kit. Also, one part number controls several parts and as a result significant effort is saved in the following departments; Equipment Engineering, Purchasing, Stores and Accounts Receivable.

Signet kits are sold for the price of the sum of the individual parts with no additional charge for kitting. The end result is all the savings are passed on to you our customer. This has been our policy since Signet was started in 1988.

The Signet 9500 Kit contains 4 each of the following parts which should all be replaced during machine maintenance.

Signet PN	Description	qty	OEM P/N
87-11565	Clamp Bolt retainer	4	715-011585-002 Ref
